

## Attributen Grid

KatanaPIM for Magento 2

Manage attribute mapping in the [KatanaPIM Connect](#) Attributes grid. Map PIM attributes to Magento attributes using inline editing.

## Accessing the Grid

---

Navigate to **Katana PIM** → **Attributes** in the admin menu.

## Grid Columns

---

Column	Description
<b>ID</b>	Internal attribute ID
<b>Katana Attribute Name</b>	Attribute label from PIM
<b>Katana Attribute Code</b>	Attribute code from PIM
<b>Type</b>	Attribute type (text, select, etc.)
<b>Magento Attribute Code</b>	Mapped Magento attribute (editable)
<b>Is Configurable</b>	Used for configurable products (editable)
<b>Skipped</b>	Excluded from sync
<b>Deleted</b>	Deleted in Magento
<b>Is Deleted</b>	Deleted in PIM
<b>Updated</b>	Last update timestamp
<b>Needs Update</b>	Requires sync

## Inline Editing

---

This grid supports inline editing for quick attribute configuration:

### Mapping Attributes

1. Click on the **Magento Attribute Code** cell
2. Select from dropdown:
  - **-- Not Mapped --** - Don't sync this attribute

- **Create New** - Create a new Magento attribute
- **[existing attribute]** - Map to existing attribute

3. Click outside the cell to save

## Setting Configurable

1. Click on the **Is Configurable** cell
2. Select **Yes** or **No**
3. Click outside to save

Set to **Yes** for attributes used in configurable products (Size, Color, etc.).

## Grid Actions

### Toolbar Buttons

Button	Description
<b>Import Attributes</b>	Fetch attributes from KatanaPIM

### Mass Actions

Action	Description
<b>Inline Edit</b>	Edit multiple selected rows
<b>Update/Create Magento Attribute</b>	Create mapped attributes in Magento
<b>Delete Magento Attribute</b>	Remove attributes (katanapim_ prefix only)
<b>Delete Records</b>	Remove from KatanaPIM table
<b>Mark Attributes as Skipped</b>	Exclude from sync
<b>Unmark Attributes as Skipped</b>	Include in sync

## Workflow

1. **Import** - Click **Import Attributes** to fetch from PIM
2. **Review** - Check all available PIM attributes
3. **Map** - Use inline edit to map to Magento attributes

4. **Configure** - Set **Is Configurable** for variant attributes
5. **Skip** - Mark unwanted attributes as skipped
6. **Create** - Use mass action to create Magento attributes

## Auto-Created Attributes

---

When selecting "Create New":

- Code: `katanapim_` + original code
- Scope: Global
- Type: Based on PIM type
- Visible: No (frontend)
